

Derma-Mineral

Special features of *Derma-Mineral*:

- Especially adapted to the needs of horses with sensitive skin and coat
- With an added extra of zinc, manganese and selenium
- ✓ With organically bound trace elements for an optimal bio-availability
- Enriched with the natural vital substances kieselguhr, bentonites, marine algae, black cumin oil, linseed oil and hemp oil as a support of skin and coat
- ✓ With 50.000 µg biotin for skin and hoofs

High-quality mineral feed especially adapted to the needs of horses with skin- and coat problems. Derma-Mineral contains a highly-available supply of bio-available minerals, vitamins and trace elements that are combined with grape seeds, marine algae, black cumin oil, kieselguhr, bentonite, linseed oil and selected yeast

Derma-Mineral supplies the horses that are prone to skin- and coat problems with a valuable supply of essential minerals, vitamins, trace elements and amino acids. At the same time Derma-Mineral supplies an extra of zinc, manganese and selenium because these are important trace elements for an intact skin metabolism.

For an optimal availability of these vital trace elements with Derma-Mineral we rely on a high amount of organically bound trace elements. These trace elements combined with the B-vitamins and biotin support skin and coat. Derma-Mineral also contains kieselguhr and marine algae which function as a natural micro-nutrient source which promote a shiny coat and the entire vitality. Bentonite have an added positive effect on the metabolism and detoxification because these natural clay minerals reliably bind heavy metals.

To support the cell regeneration with essential amino-acids Derma-Mineral is enriched with lysine and methionine. Black cumin oil, hemp oil and linseed oil deliver essential fatty acids which can have a supportive effect on skin and coat.

Feeding recommendations:

Daily 20 g per 100 kg body weight

Large Horses: 90 to 150 g per day Small Horses and Ponys: 40 to 80 g per day

Ideally suited:

✓ As an all-year round supply of minerals, vitamins and trace elements for horses with sensitive skin and coat

Derma-Mineral

Composition

Calcareous marine algae, mono calcium phosphate, sugar beet molasses, sodium chloride, calcium carbonate, wheat middling, yeast, wheat bran, magnesium oxide, linseed expeller meal, linseed oil, black cumin oil,

Analytical components

Calcium	10,0 %
Phosphorus	3,5 %
Magnesium	2,0 %
Sodium	3,0 %
Potassium	0,5 %

Lysine	1,0 %
Methionine	0,5 %
Threonine	0,1 %
Cysteine	0,1 %

Additives per kg

Vitamin A	250.000 I.E.
Vitamin D3	25.000 I.E.
Vitamin E as alpha-tocopherol-acetate	4.000 mg
Vitamin C as L(+)-ascorbic acid – pure substance	2.500 mg
Vitamin B1 as thiamine mononitrate - pure substance	600 mg
Vitamin B2 as riboflavin – pure substance	300 mg
Vitamin B6 as pyridoxine-hydrochloride – pure	300 mg
Vitamin B12	2.400 µg
Nicotinic acid as nicotinamide – pure substance	1.760 mg
Pantothenic acid as Ca-D-pantothenate – pure	1.200 mg
Folic acid as folic acid – pure substance	200 mg
Biotin as biotin-preparation	50.000 μg
Choline chloride as choline chloride – pure substance	3.000 mg
Betaine as betain-preparation	2.000 mg
Iron as iron-(II)-sulphate, mono hydrate	1.180 mg
Manganese as manganese oxide	1.750 mg
Manganese as glycine manganese chelate, hydrate	750 mg
Zinc as zinc oxide	3.040 mg
Zinc as glycine zinc chelate, hydrate	2.500 mg
7	500 mg
Zinc as zinc sulphate, mono-hydrate	Joo mg
Zinc as zinc sulphate, mono-nydrate Copper als copper-(II)-sulphate, penta-hydrate	760 mg
, , , ,	3

lodine as calcium iodate	17 mg
Selenium as sodium selenite	11 mg
Selenium as selenium in org. form of Saccharomyces cerevisiae CNCM I-3060 (inactive selenium yeast)	5 mg
Cobalt as coated cobalt-(II)-carbonate-granulate	10 mg
Kieselguhr	25.000 mg
Bentonite	50.000 mg
